Car Deal

Introduction

→ Online Car buy/sell means used cars including budget, model, prices, company etc.

→ Our project is meant to give people a better and trustworthy platform where they can sell and buy cars of their own choice and obviously on their own terms and condition.

→ With the help of internet and computer systems a man from remote area can buy/sell his car from anywhere the country/world.

Existing System

→ By requiring users to subscribe before they can buy or sell vehicles on the platform, CarDeal ensures a steady revenue stream while providing value-added services and features to its users.

→ In this system, if the visitors can visit the website once then message will not be going in their mobile/email by the existing system.

→ The existing system is paid and in this system commission is taken by subscription
